Technical Details Teknik Ayrıntılar

System has 15% inclination for better water drain. If this structure doesn't have these following features, Byart Group will not be responsible for possible knapsacks of water or similar problems concerning the running-off of rainwater. Flowing profiles number is indicative, inclinations are the least guaranteed for a correct outflow of rainwater. For inferior inclinations to least measures pointed in the table, it is possible to add one or more intermediary rails, except for technical office approval.

İyi bir su tahliyesi için en az %15 eğim olmalı. Eğer bu yapı aşağıda belirtilen özelliklere sahip değilse Byart Group yağmur oluklarından veya yağmur suyunun akmasından kaynaklanan benzer sorunlardan sorumlu olmayacaktır. Yağmur suyunun doğru yere akması için doğru eğimin verilmesi şarttır, bunun da belirleyicisi raylardır. Tabloda belirtilen en düşük ölçülere yönelik daha az eğimler için teknik ofis onayı doğrultusunda bir veya birden fazla ara ray eklenmesi mümkündür.

Anti -Wind profile / Rüzgar önleyici profil

Connection roof / Bağlantı çatısı

Foot / Ayak

Roof detail / Çatı detayı

Technical Legend / Teknik Tanım

- 1 Rail Ray
- 2 Extruded frontal water-drain Haddeden çekilmiş ön su tahliyesi
- 3 Middle flowing profile Orta akış profili
- 4 Last flowing profile Son akış profili
- 5 Pole Direk
